The City of London is collapsing, the big lies are being exposed, one by one. There is nowhere for the corrupt evil corporations to run and hide.

## Court Case - 38

The People represented by John Smith

V

All World Governments and Statutory Authorities

It had been confirmed that the Defendants were knowingly binding the people into slavery through the use of criminal coercion (attaching a legal entity/fiction to a living man/woman without their knowledge and consent).

This fraud is the largest crime in history, committed against people throughout the world.

## Class Action

Given the unlawful behaviour for our governments, we the people, will be raising a class action for damages against them in a Common Law Court.

This claim will be raised for the harm, loss and injury that they have caused to living men and women. It also relates to your government's unlawful behaviour and the covid restrictions imposed upon us all (unlawful detention, vaccinations, health passports and education for our children). We are currently collecting names in various countries for this action and will update you with additional information on our media channel [www.clc-media.uk](http://www.clc-media.uk)

Please share this information.

# GcMAF is the body's own internal medicine. ALL healthy people have it.

There are 180 eminent scientists who have published GcMAF research papers on the US National Library of Medicine alone. All healthy people have natural GcMAF inside them, this helps to combat various diseases within the body, without side effects. The immune system doesn't function without it. Without the GcMAF, we make inside us every day, we would all have died from diseases while still children. Serious illnesses, prevent production of your GcMAF, which also neutralises your immune system, so the disease can grow unchecked.

## Current Education System Kills Creativity

To start with, let's establish that learning and schooling are two very different things. The lessons needed for life are often not taught in schools (for example, no instructions on taxation or the banking system, two fundamental systems that all adults have to participate in). For many, school was more of a prison where you are taught how to think, how to behave, and how to function within a rigid, bell-ridden system that was designed to prepare young minds for the workforce through the standard technique of memorizing and regurgitating information in a test-based environment.

In order to succeed in this mandatory system, we all have to learn how to think about complex phenomena in the world in constricted, reductive, linear, and siloed ways. Everything is put in its box, science over here and language over there. This helps us learn how to break the world down into individual and manageable parts so that we can then put them together in an ordered way and conform to the pre-established system of the day. As a result, for many people, schools do a massive disservice — rebels drop out, creative s fail, people are bullied for 'not fitting in', and all the non-linear learners struggle to get through.

As famously quoted by Sir Ken Robinson's, this structure allows schools to "kill creativity," saying,

"We have sold ourselves into a fast food model of education, and it's impoverishing our spirit and our energies as much as fast food is depleting our physical bodies."

"Many highly-talented, brilliant, creative people think they're not — because the thing they were good at school wasn't valued, or was actually stigmatized." — Sir Ken Robinson

"I never let school get in the way of my education"  
— Mark Twain

## Media for living men and women

CLC Media, the new media channel that covers topics which really matter to the people.

Gone are the days that videos are removed from the server and gone are the days that the truth is hidden from the people.

We will be publishing videos on a daily basis, where they will remain for a period of seven days. After the seven day period, all videos will be permanently held in our library and listed under the relevant category.

We would also like to thank everyone who has supplied these videos which are used for educational purpose and under the fair usage policy.
